CONSULTING AND ANALYTICAL CHEMISTS  
ESTABLISHED 1910

## ANIMAL FEEDSTUFFS

Under our UKAS scope of accreditation we carry out a wide range of specific tests on commodities used in the manufacture of compound animal feeding stuffs.

We are Official Analysts to the Grain and Feed Trade Association (GAFTA), and provide analyses according to GAFTA Form 130 for contractual purposes.

Standard methods of analysis, such as AOCS and AOAC are also used to check or establish product specification.

**Mycotoxins • Ash • Fibre • Moisture  
Oil A & Oil B • Protein • Protein Digestibility.  
Protein Dispersibility • Salt (NaCl)  
Sand Only • Sand &/or Silica  
Torry Digestibility**

- **Glucosinulates**
- **Erucic Acid**
- **Trypsin Inhibitor**
- **Urease Activity**
- **Starch**
- **Sugar**
- **Protein Solubility**
- **Sodium**
- **Phosphorus**
- **Potassium**
- **Calcium**
- **Biogenic Amines**
- **Microscopical examination**
- **Determination of certain undesirable substances**

Many other tests are available. Please contact us with your requirements.
